A MAP OF
THE GREAT FOREST REGION
SHOWING THE ROUTES OF THE
EMIN PASHA RELIEF EXPEDITION
From the River Congo to the Victoria Nyanza
BY HENRY M. STANLEY.

Scale, 20 English Miles to 1 inch—1:1,267,200
English Miles. 0 10 20 30 40 50 60

NOTE.—Mr. Stanley's observations for latitude for the mouth of the Arwimi and for Yambuya did not arrive until the map had been constructed; accordingly, the position of Yambuya should be shifted 5 minutes to the west, and the lowest point of Arwimi mouth should be shifted 9 minutes to the east. Applying these corrections, the distance between the extreme points will be found to agree with Mr. Stanley's estimate in 288 of "about 90 English Miles."
